

GPS VEHICLE TRACKING

OVERVIEW

GPS tracking system are used by businesses in the service, transportation and manufacturing industries. Businesses of all sizes, with fleets of 1 to thousands of vehicles, rely upon their tracking systems to add to their profitability. For example, iTrack

Singapore GPS tracking system can be used by a company to monitor the route and progress of a delivery truck, and by parents to check on the location of their child, or even to monitor high-valued assets in transit.

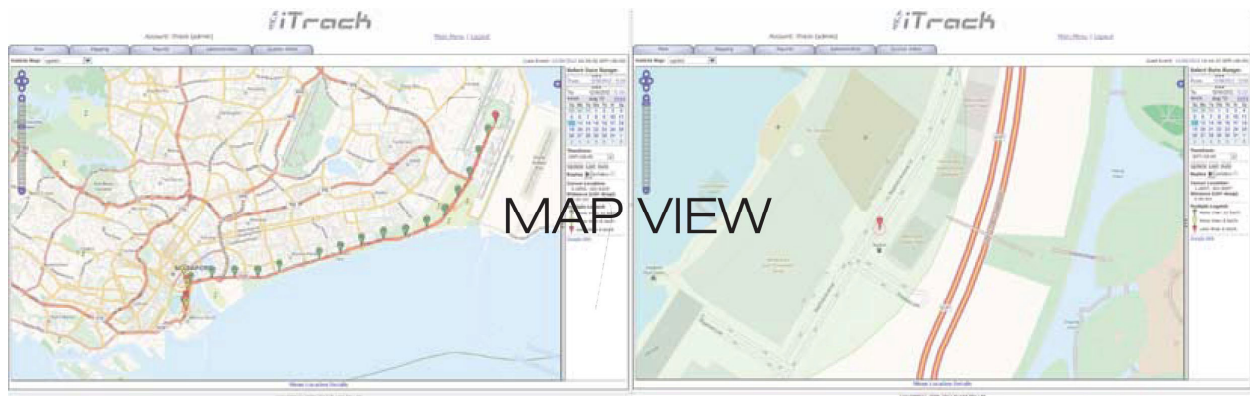

FEATURES

"Global Positioning System tracking is a method of working out exactly where something is. iTrack Singapore tracking system, for example, may be placed in a vehicle or on special GPS devices, which can either be a fixed or portable unit. GPS works by providing information on exact location and by sending to our system it also track the movement of a vehicle or person."

what our customers say about us..

Kieu Kim Seng (Director) York Launch Service Pte Ltd

"The tracking system has improved the operation effectiveness for our fleet management. My operation IC is now able to plan and advice our launch schedule more efficiently to our customers. The system also helps to eliminate any unwanted activities carried by our crews with the detail tracking information offered."

Gary Kam (IT Manager) CSC Holdings Limited

"... we are most impressed by your service staff's personal touch in providing very prompt service beyond their call of duty ..."

Yvenie Lim (Operation Manager) Sun-Gee Travel Pte Ltd

"... we sincerely appreciate the responsiveness and the way your company conduct business. We will recommend the service to others because of our satisfaction with the solution."

Ms R. Mdna (Operations Manager) Cosmopolitan Kleaning Services Pte Ltd

"... we are very pleased with the 'after sales' service too. We are able to plan our work as well as save cost with the above services. "
