

### Operation Instruction

\*When charging the solar power unit, it is optimal to place the solar board under direct sunlight. The board will still be able to attract solar energy on cloudy days. However it will take longer hours to achieve maximum charge.

\*When charge the unit using the solar panel the red indicator light is on and will turn Green when it is fully charged.

\*Under direct sunlight the unit will fully utilize solar power to generate energy for all the unit's devices. However under cloudy/dark area the unit may utilize storage energy.

### Caution

\*Do not use other battery in order to protect the unit.

\*Do not open the unit as warranty will be VOID immediately.

### Technical Specification

\*Material: Transparent mounting high impact ABS casing

\*Battery: Non-maintenance lead acid battery  
4V\*3000Ma – lifespan about 8 to 10 years.

\*Light power: 35 pcs super bright 2.5W LED elements

\*Charging Time: 8 hrs charged by solar panel.

\*Illumination Time: 10 hrs for strong light & 15 hrs for Dim light and the Size: 150\*150\*305 mm

\*Net weight: 1.3 kg/unit ( including solar panel)

\*Inbuilt ceiling hook hidden
